

## Leather and Vinyl Protectant

**Proven to be effective at reducing the effects of wear and stains on leather and vinyl.**

- Enhances feel and suppleness
- Long lasting without repeated applications
- Provides unsurpassed durability
- Carries the industry's highest safety rating
- Protects against dye transfer
- Makes cleaning easier

**Leather and Vinyl Protectant** helps keep leather looking better longer. Watery and oily spills bead up on the surface and can be easily blotted away. Leather and vinyl treated with Xzilon Leather & Vinyl Protectant provides long lasting protection against stains, blue dye transfer, and is resistant to wear.

**Holds up to repeated spot cleaning.** It produces a durable finish that helps all types of leather and vinyl retain their fresh new look longer. Leather and Vinyl Protectant can be used on all types of leather and vinyl including synthetics, natural fibers, and their blends. Helps reduce cracking and fading caused by the environment.

**Environmentally Safe and Hypergreen.** It is a non-C-8 based fluoroalkyl compound and, as such, is considered to be non-PFOA contributing. It is versatile and effective on all types of leather and vinyl. Is a water-based fluorochemical finishing agent that provides excellent water and oil repellancy, and soil resistance on all types of leather and vinyl.

# Frequently Asked Questions

### Where Does Xzilon's Leather & Vinyl Protectant Come From?

Xzilon's Leather & Vinyl Protectant is a non-C-8 based fluoroalkyl compound and, as such, is considered to be non-PFOA contributing. It is a Hypergreen solution that covalently bonds to the surface and does not end up flushed into the environment. Once applied to the surface, it gives long term protection. It is highly durable and long lasting.

### Is Xzilon Leather & Vinyl Protectant Safe?

It carries the industry's highest safety rating. It does not wear off the surface and is made with Hypergreen technology. Leather & Vinyl Protectant does not rub off onto the skin or into the environment.

### Why Should I Use Xzilon Leather & Vinyl Protectant?

To protect your leather and vinyl and keep the suppleness. It also makes cleaning easier and protects against blue dye transfer. It offers long term protection on treated surfaces with a product that won't degrade vehicle interiors.

### Provides unsurpassed protection with unsurpassed durability.

Holds up to repeated spot cleaning and helps all types of leather & vinyl retain their fresh, new look longer.

**Significantly reduces cleaning costs**, eliminating the need to purchase expensive conditioning products for daily use. Cleaning time is greatly reduced in areas treated with Leather & Vinyl Protectant, allowing for more efficiency and effectiveness.
